Elixir	Agile (that works)	
	release mgmt	AWS cloud
Docker		"devops" orientation
POSIX bash	Typescript	
Terraform	React	CI & automation
Kubernetes	REST/gql	documentation

Project Tech Lead (currently) — 2021

Led project teams in implementing entirely novel solutions while adapting to market-fit. Managed product releases and headed development, while mentoring strong teams.

Applied Blockchain Ltd
Porto, PT / London, UK

- Spearheaded the **development** of a live **market platform** that transacted **$6M USD** between users, artists and marketplaces
- Architected onboarding of **5+** new clients each with **bespoke** platform requirements while responsible for 10+ developers

---

Lead Support Engineer — 2019

Led engineering support team, bridging the operations, product and engineering team's focuses on handling user-level issues. Introduced automation to operation teams.

Fractal GmbH
Porto, PT / Berlin, DE

- Personally handled **6+ client accounts** and informed on integration implementation, **automatic reporting** and support
- Supported management and operations efforts via custom **dashboards** and **reports** via Metabase BI and a command line

---

Senior Software Engineer — 2018

Helped build security-first KYC platform, with integration via OAuth and led time-scoped feature teams. Owned system-critical identity verification platform and improved support efficiency.

Fractal GmbH
Porto, PT / Berlin, DE

- Built **React** SPAs backed by **Rails** microservices deployed to **AWS Fargate** that scaled to **10000+ concurrent** users
- Migrated existing support KYC software to integrate with newly built **OAuth** system, **improving user flow** and code maintainability

---

Software Engineer — 2016

Worked on multiple projects in areas such as VR, blockchain and education and delivered MVPs for a secure art trading platform and a mobile collectible card game.
Acqui-hired by Fractal.

Life on Mars S.A.
Porto, PT

- Pushed for efforts like more solid **automated monitoring**, tight code re-use, **data-first** analysis and resolving **data integrity** issues in team meetings and town halls
- Explored bleeding-edge tech such as **React Native** and **Ethereum**, turning them into **delivered products** after working closely with clients

---

Lead Developer — 2014

Led development team of next-gen performance and ease of use focused macOS email client with sophisticated features.

Mailcube S.A.
Porto, PT

- Led team of interns and senior year students, frequently consulting with management regarding **scope and delivery** dates
- Supported outsourced design team in tech and **UI implementation** / platform support issues, delivering **2** user-facing websites and 2 different versions of the product

---

Faculty of Engineering
U. Porto

Masters in Informatics and Computer Engineering. Member of the university senate, increasing student-worker rights.
